Technologies - React, Node, Express, , MongoDB, AWS(S3, EC2, Route53, Lambda), Git / Github, HTML, SCSS (CSS), Jira / Confluence, Adobe Creative Suite

Interests - Baking, Audio Engineering, Cryptocurrency, Trouble-shooting my extended family's technical issues

WORK EXPERIENCE

Freelance

Sep 2020 – Present

Web Developer

- Collaborated with local real estate firm to build static and responsive landing pages for launch of new properties using a React template I developed to quickly prototype and launch a cost-effective solution
- Used Craft CMS to develop new pages/email marketing for SaaS product

HomeWorks Energy

Nov 2019 – Aug 2020

Software Developer

Medford, MA

- Managed design, development and documentation of user-friendly scheduling system using **React** and **Amazon's Route 53 and Lambda**
- Developed new features and maintained our internal receipt generating tool for our staff in the field saving time necessary for manual adjustments and calculations including an overhaul of our interface
- Demonstrated ability to design, debug, test and implement full-stack features through use of **React, Node, Express, AWS and PostgreSQL**
- Worked cross-department with our marketing team in an Agile environment to develop a web presence vital to attracting a new customer base

Apartment Rental Experts

Oct 2017 - Feb 2019

Consultant

Somerville, MA

- Established clear and transparent communication with clients through the rental process

SellBoston & RE/MAX Leading Edge

April 2016 – Oct 2017

Marketing Coordinator

Boston, MA

- Designed, developed and implemented our print and digital media including marketing materials for properties, social media campaigns and advertisements

CryptoChart

- CryptoChart is a **React** web application that I built to help myself keep track of crypto prices without needing to forfeit my personal data to other services or manually track them. Based off of Coinbase's design, I built the application using **React, Chart.js, SASS** and CryptoCompare's open API

Portfolio Website

- My portfolio website was built with **React** and **SCSS** and is a showcase for my front end development skills but hosts a variety of my full-stack applications and CSS animations

EDUCATION

General Assembly

Software Engineering

Boston, MA

New England Institute Of Art

Advertising & Graphic Design

Brookline, MA
