Skills

Coding Languages - JavaScript, TypeScript, Python, SQL / PostgreSQL, Ruby

Technologies - React / React Native, Node, Express, MongoDB, Amazon Web Services (AWS), Ruby on Rails, Git / Github, HTML, CSS / SASS

Relevant Experience

Software Developer

HomeWorks Energy

NOVEMBER 2019 - AUGUST 2020

- Built client tool connected to our database for managing employee permissions
- Developed a customer-facing scheduling application using React and Amazon Web Services (AWS) such as Lambda functions
- Developed and maintained new features for our internal receipt generating tool for our staff in the field saving large amounts of time from manual adjustments
- Made enhancements and bug fixes for v1 of our scheduling tool to decrease down time and reduce manual scheduling
- Converted legacy AWS Lambda functions to use modern JavaScript syntax and refactored them to more easily scale

Projects

Trividuh

- Front-end trivia web app. Earn points for every question answered correctly and unlock more question sets as you go! Project was built using **JavaScript** and **React**

National Parks

- Didn't have a method to visually keep track of the national parks that I've already visited so built a full stack web app. Authentication is handled via **Auth0** with a **JavaScript / React** client and backend utilizing **Express, Node** and **MongoDb**

Other Experience

Consultant

Apartment Rental Experts

OCTOBER 2017 - FEBRUARY 2019

- Maintained clear and transparent communication with clients through the rental process in a fast-paced and competitive environment to exceed client expectations and to ensure client needs were met

Marketing Coordinator

SellBoston

APRIL 2016 - SEPTEMBER 2017

- Directed community engagement, increasing our social media following by 30% and running first time home buyer seminars to successfully convert new clients while handling our print and digital media campaigns

Education

General Assembly

Software Engineering

New England Institute of Art

Advertising and Graphic Design
